

Sehatlings: Leaping Healthcare Advancement

An overview of Sehatlings, a pre-seed company at the intersection of healthcare and technology.

Our team focus on creating a AI powered centralized solutions for the youth, general public, and relevant stakeholder who faced problems in diagnostic labs.

In the era of AI. Simply Locate, Analyze, And Select as per your Preference & Pocket to become a well-being!

From our foundational incubation to our extensive corporate linkages and numerous accolades, Sehatlings is committed to innovation and impactful solutions in the digital health landscape.

Vision

A world where optimal health is universally achievable.

Mission

Empowers stakeholders with the knowledge, tools, and support to proactively manage their health journeys, fostering well-being and preventing illness.

Milestones and Achievements

Our journey began with crucial early support and has progressed through consistent recognition for our innovative approach and market potential.

Incubation & Grant

1

Incubated in SSKIC, Sehatlings secured a significant grant of Rs. 500,000 in 2022, providing essential capital for prototype development.

2

Industry Recognition 2023

We proudly showcased our innovations at ITCN Asia 2023 under IoBM sponsorship, attracting attention from industry leaders. Later that year, we were selected among the Top 50 startups in the prestigious Prime Minister Innovation Program

3

Corporate Linkages & Trademark

Sehatlings has successfully build over 100 corporate linkages, expanding our network and market reach. Our brand identity is protected with a registered trademark under Class 42.

4

Awards & Finalist Status 2024

Our commitment to innovation was further recognized with selection in the Top 10 Shell Tameer Awards. We also achieved finalist status in the Web3 Competition at ITCN Asia 2024, demonstrating our forward-thinking approach.

5

Strategic Partnerships

At ITCN Asia 2023, Sehatlings co-sponsored marketing efforts with Husaini & Ehsanuallah Labs, leveraging collaborative synergies to amplify our presence and impact.

Impact in the Service Sector

Beyond our core product development, Sehatlings has made significant strides in the service sector, demonstrating our versatility and expertise in delivering high-value solutions to diverse clients, both locally and internationally.

Leadership Development at AKUH

We co-facilitated with Aga Khan University Hospital (AKUH) oncologist doctors to enhance leadership capabilities within their team in 2023.

Our team of PhD business professionals delivered 8 specialized workshops, focusing on critical leadership skills tailored to the healthcare environment.

This initiative empowered participants with actionable strategies for improved team management and organizational efficiency.

- 8 workshops delivered
- Facilitated by PhD business professionals
- Focused on leadership in healthcare

International Digital Services

Sehatlings successfully expanded its service offerings to the international market in 2024 by onboarding clients from Oman, Canada, and Pakistan providing comprehensive website development and marketing services.

This strategic move allowed us to cater to global clients, helping them establish a robust online presence and reach their target audiences effectively.

Our international clientele includes notable names like GVON, Mestro, and NexTek Healthcare, for whom we crafted tailored digital solutions. We are now offering custom web application, mobile application and AI automation solutions.

Initiatives and Engagement

With bringing national and international experience in the team. Sehatlings is continually evolving, with exciting new programs on the horizon designed to further integrate advanced technology into the healthcare sector. We are committed to fostering innovation and providing cutting-edge solutions for the future of health.

AI Courses in Healthcare

We are launching an upcoming program focused on specialized AI courses tailored for the healthcare sector.

AI in Workplace Workshop

Offering advanced AI automation solutions specifically designed for corporate entities within the health sector.

O/A & Intermediate Bootcamps

A hands-on Experiential Learning learning for the young to keep hope and work on themselves through AI practice for personal brand and growth.

Phlebotomist Rider Training

This training is developed to build an independent workforce of Sehatlings to establish opportunity for the health rider similar to Foodpanda rider.

Endowment Funds

Few of the activities will be developed through this fund. This will be created for the people to give back to the society. To establish TVET programs, to teach and to keep the hope alive.
